Medical graduate attributes as described in the website of the College

INDIAN MEDICAL GRADUATE ATTRIBUTES

Indian Medical Graduate Training Programme Specific Attributes:

The undergraduate medical education programme is designed with a goal to create an “Indian

Medical Graduate”(IMG) possessing requisite knowledge, skills, attitudes, values and responsiveness, so that she or he may function appropriately and effectively as a physician of first contact of the community while being globally relevant. To achieve this, the following national and institutional goals for the learner of the Indian Medical Graduate training programme are hereby prescribed:

Goals and Roles for the Learner

In order to fulfill the goal of the IMG training programme, the medical graduate must be able to

function in the following roles appropriately and effectively:-

1. Clinician who understands and provides preventive, promotive, curative, palliative and holistic care with compassion.
2. Leader and member of the health care team and system with capabilities to collect analyze, synthesize and communicate health data appropriately.
3. Communicator with patients, families, colleagues and community.
4. Lifelong learner committed to continuous improvement of skills and knowledge.
5. Professional, who is committed to excellence, is ethical, responsive and accountable to patients, community and profession.

Competency based learning would include designing and implementing medical education curriculum that focuses on the desired and observable ability in real life situations. In order to effectively fulfill the roles as listed above the Indian Medical Graduate would have obtained the

following set of competencies at the time of graduation:

1. Clinician, who understands and provides preventive, promotive, curative, palliative and holistic care with compassion

- Demonstrate knowledge of normal human structure, function and development from a molecular, cellular, biologic, clinical, behavioural and social perspective.
- Demonstrate knowledge of abnormal human structure, function and development from a molecular, cellular, biological, clinical, behavioural and social perspective.
- Demonstrate knowledge of medico-legal, societal, ethical and humanitarian principles that influence health care.
- Demonstrate knowledge of national and regional health care policies including the National Health Mission that incorporates National Rural Health Mission (NRHM) and National Urban Health Mission (NUHM), frameworks, economics and systems that influence health promotion, health care delivery, disease prevention, effectiveness, responsiveness, quality and patient safety.
- Demonstrate ability to elicit and record from the patient, and other relevant sources including relatives and caregivers, a history that is complete and relevant to disease identification, disease prevention and health promotion.
- Demonstrate ability to elicit and record from the patient, and other relevant sources including relatives and caregivers, a history that is contextual to gender, age, vulnerability, social and

economic status, patient preferences, beliefs and values.

-Demonstrate ability to perform a physical examination that is complete and relevant to disease

identification, disease prevention and health promotion.

– Demonstrate ability to perform a physical examination that is contextual to gender, social and

economic status, patient preferences and values.

– Demonstrate effective clinical problem solving, judgement and ability to interpret and integrate

available data in order to address patient problems, generate differential diagnoses and develop

individualized management plans that include preventive, promotive and therapeutic goals.

– Maintain accurate, clear and appropriate record of the patient in conformation with legal and

administrative frame works.

– Demonstrate ability to choose the appropriate diagnostic tests and interpret these tests based on

scientific validity, cost effectiveness and clinical context.

-Demonstrate ability to prescribe and safely administer appropriate therapies including nutritional interventions, pharmacotherapy and interventions based on the principles of rational

drug therapy, scientific validity, evidence and cost that conform to established national and regional health programmes and policies for the following:

(i) Disease prevention,

(ii) Health promotion and cure,

(iii) Pain and distress alleviation, and

(iv) Rehabilitation.

– Demonstrate ability to provide a continuum of care at the primary and/or secondary level that

addresses chronicity, mental and physical disability.

– Demonstrate ability to appropriately identify and refer patients who may require specialized or

advanced tertiary care.

– Demonstrate familiarity with basic, clinical and translational research as it applies to the care

of the patient.

2. Leader and member of the health care team and system

– Work effectively and appropriately with colleagues in an inter-professional health care team

respecting diversity of roles, responsibilities and competencies of other professionals.

– Recognize and function effectively, responsibly and appropriately as a health care team leader

in primary and secondary health care settings.

-Educate and motivate other members of the team and work in a collaborative and collegial fashion that will help maximize the health care delivery potential of the team.

– Access and utilize components of the health care system and health delivery in a manner that is

appropriate, cost effective, fair and in compliance with the national health care priorities and policies, as well as be able to collect, analyze and utilize health data.

-Participate appropriately and effectively in measures that will advance quality of health care and patient safety within the health care system.

– Recognize and advocate health promotion, disease prevention and health care quality improvement through prevention and early recognition: in a) life style diseases and b) cancers, in

collaboration with other members of the health care team.

3. *Communicator with patients, families, colleagues and community*

– Demonstrate ability to communicate adequately, sensitively, effectively and respectfully with

patients in a language that the patient understands and in a manner that will improve patient satisfaction and health care outcomes.

– Demonstrate ability to establish professional relationships with patients and families that are

positive, understanding, humane, ethical, empathetic, and trustworthy.

– Demonstrate ability to communicate with patients in a manner respectful of patient's

preferences, values, prior experience, beliefs, confidentiality and privacy.

-Demonstrate ability to communicate with patients, colleagues and families in a manner that encourages participation and shared decision-making.

4. *Lifelong learner committed to continuous improvement of skills and knowledge*

– Demonstrate ability to perform an objective self-assessment of knowledge and skills, continue

learning, refine existing skills and acquire new skills.

– Demonstrate ability to apply newly gained knowledge or skills to the care of the patient.

– Demonstrate ability to introspect and utilize experiences, to enhance personal and professional

growth and learning.

– Demonstrate ability to search (including through electronic means), and critically evaluate the

medical literature and apply the information in the care of the patient.

– Be able to identify and select an appropriate career pathway that is professionally rewarding

and personally fulfilling.

5. *Professional who is committed to excellence, is ethical, responsive and accountable to patients, community and the profession*

– Practice selflessness, integrity, responsibility, accountability and respect.

– Respect and maintain professional boundaries between patients, colleagues and society.

– Demonstrate ability to recognize and manage ethical and professional conflicts.

– Abide by prescribed ethical and legal codes of conduct and practice.

– Demonstrate a commitment to the growth of the medical profession as a whole.
